Description

This section is a challenge for kayakers, primarily because of the famous Sulęczyńska Valley, many fallen trees that you will have to overcome during these two-day-long trip which means over 32 kilometers of great kayaking adventure. Normally canoeists cover this distance in three days, so do not expect much resting. Here you will experience both fast sections including the most extreme section on Słupia and entire Pomerania (so called Sulęczyńska Valley) as well as quieter passages offering contemplation of the landscape on one hand but on the other - for sure you will not miss rowing. Beautiful surroundings, contact with nature and adrenaline combined with the possibility to rest are the hallmarks of this section. You must also remember about transporting the kayaks from Byliny (after leaving Lake Żukowskie) to Soszyca, due to hydro-technical components of channel supplying the water to the oldest hydroelectric power station on Słupia.
