Description

Using three words one could summarize this section as "It's happening"! It is one of the wildest, most interesting, yet demanding sections in this part of the region. In addition to many strong rapids and fast current you will come across so called "zwałki" - or fallen trees here and omitting them is often problematic. Do not count on an easy solution in the form of empty spaces, because it is a rarely visited section, explored only by a group of the most persistent canoeists. Because this section is suitable only for experienced and tenacious individuals. Here you will feel amazingly close to nature and discover the true face of canoeing. Only at the end of this trip you will be able to rest, because the last part of this section involves canoeing down the channel. But remember - as on this section you may experience some problems concerning water level - find out in advance whether it makes sense to head towards this section in the planned period.
